1. Organisation Overview

Organisation Name
Hlubi's Green Harvest Farm

Introduction:

An imaginary farming business is named
Green Harvest Farm by Hlubi was established in 2026. The farm produces fresh fruits, vegetables, eggs, mazie and herbs using sustainable farming practices. The organization's goal is to supply local businesses, restaurants, supermarkets, and individuals with reasonably priced and healthful farm products.

Along with promoting healthy lifestyles the farm also aims to educate the community about sustainable agriculture. The company intends to create a polished website where customers can be able to discover more about the farm, browse products and get in touch with the company in order to enhance customer communication and expand its online presence.

Mission Statement:

To deliver superior customer service while using sustainable farming methods to produce fresh, high-quality agricultural products.

Vision Statement:

To become a reputable farming company in South Africa by promoting ecologically friendly farming practices and offering wholesome farm products.

Target Audience:

- Customer's seeking out fresh produce from the farm.
- Local restaurants and supermarkets
- Farmers who want to practice sustainable farming.
- Local community members.

2. Website Goals and Objectives

Website Goals

The website aims to:

- To encourage the Green Harvest Farm in Hlubi.
- To display farm -fresh goods
- To describe the farm and its offerings.
- To permit clients to get in touch with the farm.

Website Objectives

The website will:

- To give accurate details about the farm.
- Display goods with pictures and descriptions.
- Provide an inquiry contact page.
- Be user-friendly.
- Utilize desktop and mobile devices for work.

Key Performance Indicators (KPIs)

The success of the website will be measured by:

- More people that are visiting the website.
- The quantity of consumer inquiries.
- The quantity of items viewed.
- Satisfied customers.
- An increase in product orders.

3. Current Website Analysis

Since Hlubi's Green Harvest Farm is a new company it does not yet have a website. In order to create an online presence a new website will be created.

Strengths

- The chance to create a cutting-edge, polished website.
- To make sure that Navigating is simple.
- Powerful branding using the logo, colors, and images.

Weaknesses

- no online presence at the moment.
- Online product browsing is not possible for customers.
- Limited interaction with prospective clients.

Opportunities

- Use the internet to reach more clients.
- By encourage farming that is sustainable.
- Boost inquiries and sales.

Threats

- The competition from other farming companies.
- Shifts in consumer preferences.
- Danger to internet security.

4. Proposed Website Features and Functionality

The website will contain the following pages:

Home:
Hlubi's Green Harvest Farm will be introduced and visitors will be greeted on the home page.

About Us:
The farm's history mission and vision will be all covered on this page.

Products:
Consumers will have access to a variety of farm products such as

- Fresh vegetables
- Fresh fruits
- Maize
- Eggs
- Herbs

Gallery
Pictures of the farm ,crops and farming operations will be shown on this page.

Contact
Through a contact form and contact information visitors will be able to get in touch with the farm.

Website Features:

- The navigation menu
- Gallery of images

- Contact form
- Design that is responsive
- Social media links

5. Design and User Experience

Website Design

The website will reflect the farming industry with a clean, contemporary and professional design. Visitors of all ages will find the design to be straightforward, appealing and simple to use.

Colour Scheme

Food and Agriculture Organization of the United Nations (FAO). (n.d.) *Sustainable food and agriculture*. Available at: https://www.fao.org/sustainability/ (Accessed: 9 August 2026).

colors that symbolize agricultural and nature will be used on the website:

- Green – Represents plants, growth, and nature.
- Brown – Represents soil and farming.
- White – Creates a clean and professional appearance.
- Yellow – Represents sunshine and harvested crops.

Typography

Simple readable fonts like these will be used on the website:

- **Headings:** Arial Bold
- **Body Text:** Calibri

Navigation

Every page will have a navigation menu at the top that includes:

- At home
- About us
- Goods
- Gallery
- Get in touch

This will make it simple for users to switch between pages.

Layout

Each webpage will consist of:

- The header
- The navigation bar
- Primary Content
- Footer.

Experience of the User

The webpage will:

- Be simple to use.
- Quickly load.
- Clearly display the information.
- Make use of top-notch farming photos.
- Utilize mobile phones, tablets, and desktop computers

Low-Fidelity Wireframe

6. Technical Requirements

Domain name

wwe.hlubigreenharvestfarm.co.za

1. Organisation Overview

Organisation Name
Isiko Heritage Clothing

Introduction:

Isiko Heritage Clothing is a fictional South African traditional clothing company honors cultural heritage by using traditional clothing and accessories . The company sells traditional clothing from various South African cultures such as Zulu, Xhosa, Sotho, Tswana, Venda, Tsonga, Ndebele, and Swati.

The company wants to encourage respect and admiration for South African cultural heritage while making traditional clothing affordable for consumers. Visitors will be able to view photos learn more about the company and explore various traditional clothing collections and also get in touch with them via the proposed website.

Mission Statement
To celebrate and preserve South Africa's rich cultural legacy while offering premium traditional attire.

Vision Statement
Ti start a respectable traditional clothing business that introduces people to South African culture thru clothing and fashion heritage.

Target Audience
The purpose of the website is to:

- Individuals seeking for traditional attire.
- Clients to participate in customary events and festivities.
- Those who are curious about South African culture.
- Families searching for traditional attire.
- Cultural event groups and wedding parties.
- Visitors who are drawn to traditional South African attire.
- Consumers seeking conventional accessories.

2. Website Goals and Objectives

Website Goals

The website seeks to:

- To advertize Isiko Heritage Clothing on the internet.
- To display various collections of traditional apparel.
- To raise awareness of traditional South African clothing.

- To make it simpler for clients to see apparel.
- Make it simple for clients to get in touch with the company.

Website Objectives

The webpage will:

- Use pictures and descriptions to showcase traditional attire.
- Arrange clothes in accordance with cultural collections.
- Give details about the company.
- Offer contact details for inquiries from customers.
- Make a visually appealing and user-friendly website.
- Verify that the website functions on smartphones, tablets, and PCs.

Key Performance Indicators (KPIs)

The website's effectiveness will be evaluated by :

- The quantity of people who visit the website.
- The quantity of product/clothing views.
- The quantity of consumer inquiries.
- The quantity of contact form submissions.
- Customer comments.
- The quantity of inquiries regarding traditional apparel lines.

3. Current Website Analysis

Since Isiko Heritage Clothing is a frictional new company it does not yet have a website.

Strengths

- The chance to start from scratch with a contemporary website.
- The capacity to develop a powerful cultural brand identity.
- A wide range of traditional attire to display.

Weaknesses

- There is no current internet presence.
- At the moment, customers are unable to view clothing online.
- Consumers require an alternative method of product inquiries.

Opportunities

- Reach clients all over South Africa.
- Encourage various traditional South African fashion trends.
- Boost client inquiries.
- Establish a web presence.
- Inform guests about traditional attire

Threats

- The competition from other conventional apparel companies.

- Copyright problems with pictures of clothing.
- Cultural misrepresentation due to inadequate research.
- Risks to online security.

4. Proposed Website Features and Functionality

There will be five primary pages on the website:

Home

- The Greetings
- Showcased traditional attire
- The primary image
- Overview of the company

About Us

- History of the business
- The mission
- The vision
- Culture norms.

Traditional Wear

- Traditional Zulu Clothes
- Traditional Xhosa Clothes
- Traditional Sotho Clothes
- Traditional Tswana Clothes
